

The Arab / Israeli conflict - only a fool would believe that this conflict is about land

Israel (the tiny strip in red) and its Muslim neighbors.

Politicians and the media have been trying to convince us that the conflict between Israelis and Arabs is about land. The Arab World is made up of many millions of square kilometers of empty land. There is no shortage for land in the Arab world. In reality land has nothing to do with this conflict at all. Land is only used as a front to cover up a far more sinister agenda.

Israel:	20,770 km ²
Saudi Arabia:	2.15 million km ²
Algeria:	2.382 million km ²
Egypt:	1.01 million km ²

The tiny yellow sliver is Israel

Arab/Muslim countries in red
